

Timor Resources on LinkedIn 13 June 2025

We are pleased to share the results of an independent resource audit conducted by Molyneux and Associates, validating the substantial contingent and prospective oil, gas, and liquids resources within our onshore permits in Timor-Leste.

Certified Resource Summary:

Contingent Resources

- ◆ 1C: 10.3 MMBOE
- ◆ 2C: 19.9 MMBOE
- ◆ 3C: 66.3 MMBOE

Prospective Resources

- ◆ 1U (P90): 242 MMBOE
- ◆ 2U (P50): 801 MMBOE
- ◆ 3U (P10): 2,788 MMBOE

These figures reflect a rich portfolio of natural gas, oil, and condensate across both discovered and yet-to-be-drilled prospects. Notably, the 2C contingent resources include 52 BCF of gas and 11 MMBBLS of oil, underpinning a strong case for development.

Next Steps

Timor Resources is preparing for appraisal for development drilling, which will serve to confirm reservoir flow rates and advance field development planning.

📍 These onshore discoveries, strategically located near existing infrastructure on the South Coast of Timor-Leste, are poised to contribute meaningfully to domestic energy security and regional supply dynamics.

We are committed to transparency, technical excellence, and stakeholder value creation as we progress from discovery towards development/production.
