

PETROLEUM FUND QUARTERLY REPORT

Quarter ended 31 December 2013

PRESS RELEASE

The Banco Central de Timor-Leste (BCTL) today released the Quarterly Report of the Petroleum Fund of Timor-Leste for the period ended 31 December 2013. The report shows that the capital of the fund as of 31 December 2013 was \$ 14.9 billion compared to \$ 14.6 billion at the end of the previous quarter.

The report shows that the gross capital inflows during the quarter were \$ 604.70 million, consisting of \$ 234.70 million as contributions of taxpayers to the Fund, and royalty contributions from the NPA (National Petroleum Authority) of \$ 370.00 million.

The gross investment income of the Fund was \$342.88 million of which the coupon and interest received was \$68.10 million and the change in the market valuation of its financial assets was \$274.77 million. This resulted in a portfolio return of the Fund for the quarter of 2.33%, while the benchmark return for the period was 2.27%.

The Petroleum Fund law specifies that the Operational Manager (Banco Central de Timor-Leste) is the agent responsible for the operational management of the Fund. The Ministry of Finance is responsible for setting the overall investment strategy for the Fund.

Following Minister's decision to progressively increase the equity exposure to 40% by 30 June 2014, the existing equities managers' exposure had been increased to 34% by the end of December 2013.

Following the Minister's decision on a new allocation of 10% of the Fund to non-US developed market sovereign bonds, the Central Bank appointed an interim manager from its standby panel to manage the mandate passively on an interim basis from 26 August.

The mandate given to BIS was to manage a single US Treasury 5-10 years index with the same risk and return characteristics of outperforming the benchmark while maintaining an ex-ante tracking error within 100 basis points.

The mandate given to Schroders is to manage the portfolio in an enhanced passive indexing style and maintained within a tracking error relative to the benchmark that does not normally exceed 100 basis points, and with load differences maintained within 0.5% (security level) and 2.5% (country and sector levels). At no time shall the ex-ante tracking error exceed 150 basis points.

The mandate given to SSgA and Black Rock is to be managed in a passive indexing style with the objective to seek to closely match the Performance Benchmark, before tax and fees and
