Timor-Leste FY12

Immunization Rates

Data

8.76 (100%)

Population

GNI/Cap: \$1,280

1.177.834

LIC LMIC

GNI/Cap: \$2,555 Based on dubious World Bank information on Timor-Leste's GNI, MCC downgraded Timor-Leste from a Low-Middle Income Country (LMIC) to a Low-Income Country (LIC) for FY2012.

According to other sources, TL's GNI/capita in 2010 was around \$2,555, more than the \$1,280 used by

WB/MCC and well above the \$1,916 level for LMICs.

La'o Hamutuk recalculated TL's MCC scorecard for FY2012 to compare this country with other LMICs, as well as with Timor-Leste's scores during the past two years. We added our calculations in green, with vellow background, on top of MCC's scorecard below.

How to Read this Scorecard: Each MCC Candidate Country receives an annual scorecard assessing its performance in 3 policy categories: Ruling Justly, Investing in Peopl and Economic Freedom. Under the name of each indicator is the country's score and percentile ranking in its income peer group (0% is worst; 50% is the median; 100% is best). Under each country's percentile ranking is the peer group median. Country performance is evaluated relative to the peer group median. Scores above the median, represented with green, meet the performance standard. Scores at or below the median, represented with red, do not meet the performance standard. The black line that runs along the horizontal axis represents the peer group median. Each of the Worldwide Governance Indicators (World Bank/Brookings Institution) is accompanied by a margin of error, which is represented by the vertical blue bar.
