# Developing the Districts

## Introduction

This is the second year in which the Government is publishing information about the State Budget and how it is allocated by district. The district summaries which are published contain a brief overview of each district including information on the existing number of schools, health posts and number of clinics, as well as a map of the district. The overview also contains the number of government staff employed in every district and the budgeted amount of money that is expected to be spent specifically in the district.

This information has been compiled from individual line Ministry budget submissions to the Ministry of Finance, and this is the first year that the Government has had the systems in place to record this information alongside its regular financial data. Therefore, we expect the volume and quality of this information to improve every year, however, we also recognise that this is an important step in helping policymakers make better decisions about resource allocation.

## Expenditure in districts

The profile shows the expenditure that has been identified for each district by the line ministries. Recurrent expenditure and capital items that are national and which therefore have an impact on the whole country have not been included in the budgeted amount.

These expenditures are split into salaries and wages paid to state employees based in district, goods and services, capital developments as well as transfer payments which are made to either groups as public grants or individuals as pensions or welfare payments.

The data in this chapter is based on the information from the line ministries, secretaries of state and autonomous agencies. These government organisations have provided the breakdown and allocated their budget across the 13 districts of Timor Leste.

## Capital development

For a country as diverse as Timor with a population living in 13 different districts it is important that the capital budget is allocated across the country in a fair way. The long term objective is that the government's infrastructure is at the same level in every district and its citizens everywhere have access to the same level and quality of basic services. The fairness principle for allocating capital budget is defined as a capital budget that is allocated across districts where by districts with an existing infrastructure (schools, police posts, water and sanitation, health facilities, roads) that is below the national average receive a larger share for upgrading and increasing their infrastructure to the same level as the others.

However one has to keep in mind that Timor Leste is a developing country with a fast growing population. Even districts with a infrastructure above the national average still have pressing needs to meet the most basic demands from their population. Capital to those 'better off' districts will still be needed to improve, increase and provide access to basic services most needed by the poor in all districts.

In the end, there will always be a difference between districts. More densely populated districts can provide the same level of services to a larger population with a lower number of schools and health facilities. Also geographical variations such as a mountainous terrain can contribute to differences such as the length of sealed roads.

## **Education**

Educating the school aged population is an important factor in fostering economic development in the districts and subsequently in the country. One of the challenges the country is facing, is the rapid growth of the population and a consequently growing young population that needs to be educated. Therefore, in 2010 the Government will allocate a substantial share of the state's capital budget to the Ministry of Education for improving existing schools and building new ones. The ministry of education's capital budget for 2010 amounts to \$ 10,394,000.

Currently Timor Leste has 1010 Primary schools, 168 pre secondary and 73 secondary schools.<sup>1</sup> On average the country has one primary school for every 1,071 people, one pre secondary school for every 6,433 people and one secondary school for 11,843 people.

**Table 1.1: number of schools and average number of people for one school**

	Number	No of people/ school
Primary schools	1010	1,071
Pre secondary	168	6,433
Secondary	73	11,843

The aim of the Government is that districts with a number of schools that is relatively below the national average should gradually receive a larger share of the available capital budget. It will increase their number of schools and bring them to the same level as other districts.

## **Health**

It is also the Government's intention that the capital budget for health should be allocated across the districts following the fairness principle. The total budget for health is \$ 10,321,000. Of this amount, \$ 2,700,000 is allocated to two capital projects which are beneficial for the whole country. The projects are going to be implemented in the capital Dili but are beneficial to the whole country and. The total budgeted amount for the ministry of Health on capital spending for the districts is \$ 7,621,000.

The following table shows the number of health facilities for the whole of the country. The second column gives the number of people on average served by one health facility. This number will be different for every district.

Infrastructure	Number <sup>2</sup>	No of people/ health facility
Hospitals	6	180,124
Community Health Centres	66	16,375
Health posts	195	5,542

<sup>1</sup> The number of schools includes the number of private schools in every district. These figures are from the national statistic's office as published in their publication, Timor-Leste in figures 2008, edition 2009

<sup>2</sup> The number of hospitals, community health centers, health posts and private clinics is based on information from the Ministry of Health

Table 1.2:	Private Clinics	41	26,360	number of
	health facilities and average number of people covered			

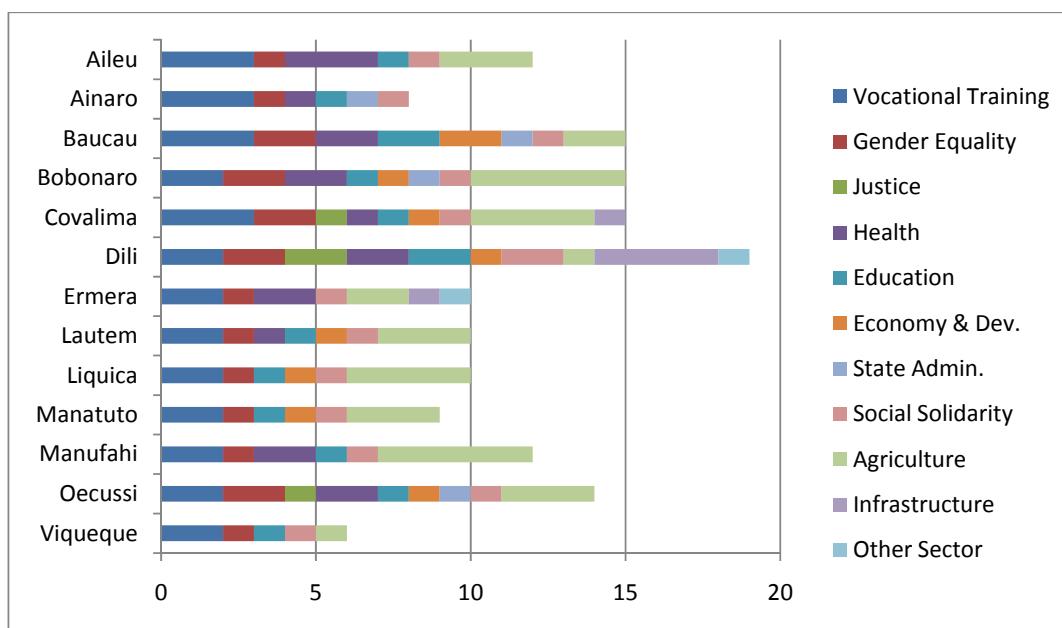

Capital budget should be allocated across the country in such a way that the number of health facilities increases in those districts where on average more people are served by a facility.

## Donor spending

The budget book for the first time contains information on donor spending by district. The Aid Effectiveness office based on information from development partners and the donor community has compiled for every district a paragraph with the number of projects

Projects to be implemented in districts in 2010 with support of Development Partners are described below. It should be noted, however, that existing data doesn't allow a breakdown of financial amounts in districts. Thus in this section, only number and sector of projects are described. Regarding number of projects, only projects which are included in this Budget Book (i.e., projects defined as part of the Combined Sources Budget (CSB) and projects not defined as part of the CSB but associated with a specific Ministry). Accordingly, projects which could not be assigned to a specific or individual Ministry or sector are not included in the Chart below.

**Chart 1.1: Number of Projects implemented in 2010 by Districts and Sectors**

The Chart above shows that Development Partners plan to implement 19 projects, with the largest numbers of projects, in Dili. Dili is followed by Baucau, Bobonaro and Covalima with 15 projects respectively, then Cova lima with 14 projects. However, it should be noted that many of projects cover not just one districts but several districts.

## General overview – capital development

The capital development budget for Timor Leste in the state budget for 2010 is \$ 216,782,161. Of this budget a total of \$ 90,778,632 is classified as multi district and seen as beneficial to the whole country. This amount is not allocated to a specific district. The remainder,\$125,862,529 is allocated across the districts by Ministry. Graph 1.2 shows the allocation of the capital budget across the 13 districts of the country. Table 1.3 provides the amount by Ministry for every district.

**Chart 1.2: Government spending in the districts – capital & development**

**Table 1.3: Capital development allocated across districts**

## **General overview – recurrent expenditure**

The introduction of the new Performance Budgeting system for the formulation of the budget 2010, has given ministries the possibility to provide information on the recurrent allocation of their budget across districts. Capital development and recurrent expenditure that is utilized for the whole country or more than one district is not allocated to a specific district. Given the fact that this is the first year the government requested Ministries to provide information on a budget break down by district not every Ministry was able to fulfil this specific request. It is a new process for them and this year should be seen as start. In the upcoming years the Ministries can familiarize themselves with this process. They will receive training on this topic and develop the necessary skills to actually provide a meaningful breakdown of their budget by district.

Other issues related to this topic are that some ministries are organised by region (Ministry of Education) rather than by district. Some other ministries will spend a substantial share of their budget in the districts, however, the actual amount spent in a specific district is not known before the beginning of the financial year. It is depending on the requests coming from districts (Secretary for Energy Policy)

The total recurrent budget for the Timor Leste is \$ 420,051,000. Of this amount \$ 83,932,000 has been allocated across the districts. The table on the next page shows the expenditure by Ministry. A more detailed breakdown is provided in every district chapter.

**Table 1.4: recurrent spending in Districts by Ministry (\$,000)**

# Dili

The District of Dili has an area of 372 km<sup>2</sup>, at the time of the 2004 census there was a population of 181,997 people. The District of Dili is situated along the northern coast of the island of East Timor, approximately 60 kilometres east of the border with West Timor. The District of Dili has six sub districts; these are shown in Table 2.1 with their corresponding sucos.

**Table 2.1**  
**Sub-Districts and Sucos of Dili**

Ataúro	Cristo Rei	Dom Aleixol	Metinaro	Nain Feto	Vera Cruz

Vila	Kamea			Bemori	Vila Verde
	Kulu Hun			Gricenfor	Colmera
	Hera				Motael

#### **Government Personnel and Services Profile**

In 2010 10,712 employees of the State will be working in the District of Dili, these include:

- 619 Policemen;
- 1,468 Primary School Teachers;
- 1,079 Secondary School Teachers;
- 68 Local doctors (including specialists);
- 405 Nurses and midwives.

#### **Dili – recurrent spending in 2010**

In 2010, recurrent expenditure for Dili as reported by the line ministries is estimated to be \$ 21,540,000. Table 2.2 shows the allocation by government agency and appropriation category.

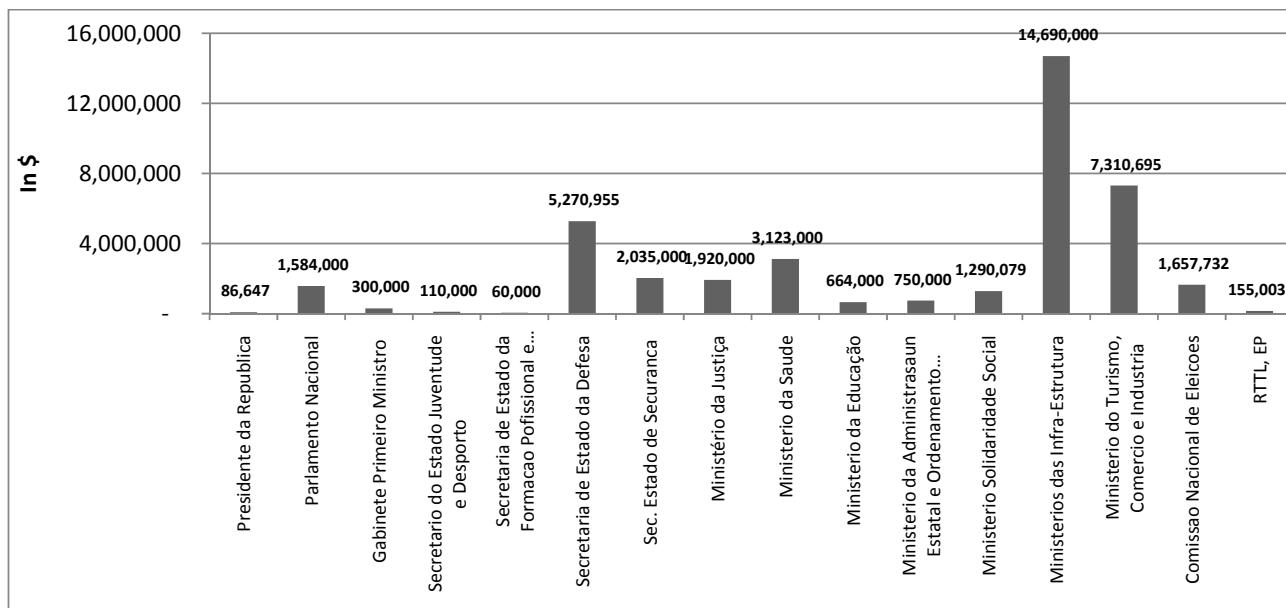

**Table 2.2: recurrent spending 2010 in district of Dili (in '\$000)**

	01 Salary & Wages	02 Goods & Services	03 Minor Capital	05 Transfers	Grand Total
01 Dili – Total	6,111	10,717	1,844	2,867	21,540

24 Procuradoria Geral da República	60	93	9		162

## Dili – Capital & development in 2010

Total capital development for the district of Dili will be \$ 41,007,000. Chart 2.1 provides a breakdown of capital investment by Ministry.

**Chart 2.1: capital & development in Dili**

## Dili – Donor spending

In total 19 projects are planned to be implemented in Dili District in 2010. Out of these 19 projects, capital development component have been identified in the following 2 projects - ILO's Youth Employment Project (YEP) and TIM-Works. The YEP component of capital development includes capital works such as road maintenance and the improvement of irrigation systems. The TIM-Works focuses on rural road rehabilitation. These two last projects are planned to be implemented in all 13 districts.

## Dili - Education

The table below shows the number of schools and the number of people per school. The number of people in Dili that are reliant on one school is above the national average. The construction of new schools should bring Dili closer to the national average.

**Table 2.3: Education**

Education	Number	No of people/ school
Primary schools	71	2,993
Pre secondary	22	9,658
Secondary	19	11,183

According to the Ministry of Education capital investment in the education sector for Dili is estimated to be \$ 664,000. This includes the construction of three new primary schools in the Dili district.

## Dili - Health

The table below shows the number of health facilities and on average the number of people served by one facility. The number of community health centres and health post is below the national average whereas the number of private clinics is above.

**Table 2.4: Health**

Health	Number	No of people/ health facility
Hospitals	1	-
Community health Centre	6	35,412
Health posts	8	26,559
Private clinics	11	19,315

The investment in the expansion of the health infrastructure is estimated to be \$ 3,123,000 for Dili in 2010. The capital budget includes the construction of three maternity health centres.

**Table 2.5 Capital & Development projects Dili**

### Baucau – Capital & development in 2010

Total capital development for the district of Baucau will be \$ 7,189,069. Chart 3.1 provides a breakdown of capital investment by Ministry.

**Chart 3.1: capital & development in Baucau**

### Baucau – Donor spending

In total 15 projects are planned to be implemented in Baucau District in 2010. Capital has been identified in ILO's Youth Employment project and TIM-works.

### Baucau - Education

The table below shows the number of schools and the number of people per school . The number of people in Baucau that is reliant on one school is better than the national average.

**Table 3.3: Number of schools**

<b>Education</b>	<b>Number</b>	<b>No of people/ school</b>
Primary schools	133	855
Pre secondary	29	3,922
Secondary	9	12639

According to the Ministry of Education capital investment in the education sector for Baucau is estimated to be \$ 418,000. This includes the rehabilitation of two primary schools and the construction of one new primary school in the Baucau district.

### Baucau - Health

The table below shows the number of health facilities and on average the number of people served by one facility. The number of community health centres and health posts is better than the national average.

**Table 3.4: number of health facilities**

Health	Number	No of people/ health facility
Hospitals	1	-
Community health Centre	6	18,958
Health posts	23	4,946
Private clinics	2	56,874

The investment in the expansion of the health infrastructure is estimated to be \$ 3,564,000 for Baucau in 2010. The capital budget includes the construction of four maternity health clinics.

## Aileu– Capital & development in 2010

Total capital development for the district of Aileu will be \$ 1,564,900. Chart 4.1 provides a breakdown of capital investment by Ministry.

**Chart 4.1: capital & development in Aileu**

## Aileu – Donor spending

In total 12 projects plans to be implemented in Aileu District in 2010. Like in other the other districts ILO's Youth employment Project (YEP) and TIM works include capital development components.

### Aileu - Education

The table below shows the number of schools and the number of people per school . The number of people in Aileu that is reliant on one school is around the national average.

**Table 4.3: Number of schools**

Education	Number	No of people/ school
Primary schools	64	975
Pre secondary	9	6,934
Secondary	4	15,602

According to the Ministry of Education capital investment in the education sector for Aileu is estimated to be \$ 426,000. This includes the rehabilitation of four primary schools and the construction of one new pre secondary school in Aileu district.

### Aileu - Health

The table below shows the number of health facilities and on average the number of people served by one facility. The number of community health centres and health posts is better than the national average.

**Table 4.4: number of health facilities**

<b>Health</b>	<b>Number</b>	<b>No of people/ health facility</b>
Hospitals	0	-
Community health Centre	4	15,602
Health posts	10	6,241
Private clinics	1	62,407

The investment in the expansion of the health infrastructure is estimated to be \$ 141,000 for Aileu in 2010. The capital budget is for the construction of a Maternity clinic in Aileu
