The Council of Ministers approved, with amendments, the draft Government Decree, presented by the Prime Minister, Taur Matan Ruak, on the measures for implementing the Declaration of the State of Emergency, carried out by the Decree of the President of the Republic no. the 17/2021, of March 31, to respond to the pandemic COVID-19. The state of emergency, now renewed, covers the entire national territory and is in effect between 00.00 hours on April 3, 2021 and 23.59 hours on May 2, 2021.

The measures imposed by this diploma are similar to the rules for implementing the previous Declaration of the State of Emergency. It is noteworthy that it is now established that all individuals suspected of being infected or who have had contact with those infected with SARS-Cov-2 are required to undergo tests to detect infection with the new Coronavirus.

Thus, most of the measures that have already been approved and are being implemented will continue, namely the ban on land border crossing for traditional or customary purposes and for access to regulated markets.

All individuals who want to enter or leave the territory remain subject to sanitary control, preventing international circulation to all those who show symptoms of COVID-19.

The imposition of mandatory prophylactic isolation (quarantine) is maintained for all individuals who enter the national territory from abroad, who show symptoms of COVID-19, who are suspected of being infected with SARS-CoV-2, but whose tests for COVID-19 are inconclusive, whether they are health professionals who have worked in an isolation center where care is provided for patients with COVID-19 or those infected with SARSCov-2 and who have been in close contact, have cohabited or shared the same environment with a patient with COVID-19. Expenses related to prophylactic isolation are borne by each individual when it is carried out in a private health establishment, residence or isolation center.

All individuals who have been diagnosed with COVID-19 are subject to therapeutic isolation, which can be carried out at home, by reasoned order from the Minister of Health.

During the term of the present diploma, all individuals residing in Timor-Leste remain obliged to maintain a distance of at least one meter from other individuals with whom they do not live in a common economy. They are also obliged to wear a face mask that covers their nose and mouth when they have to access or remain in public or private spaces for collective use and to wash their hands when they intend to enter commercial, industrial or service establishments or in buildings where public administration services. All people also remain obliged to avoid the formation of agglomerations on the public road.

The Council of Ministers also approved the draft Government Resolutions for the maintenance of the imposition of a sanitary fence and general home confinement of the population of the municipality of Díli until 23.59 hours of April 16, 2021 and in the Municipalities of Baucau and Viqueque until at 23.59 hours on April 9, 2021.

All the rules previously defined in the Government Resolutions that imposed sanitary fences and home confinement in these municipalities are maintained.

Thus, the movement of people between these municipalities and the other administrative districts continues to be prohibited, except in duly justified cases for reasons of public security, public health, humanitarian assistance, maintenance of public supply systems or the pursuit of the public interest.

There also remains the imposition of general home confinement of all people who currently reside or are in the municipalities of Díli, Baucau and Viqueque, except for the reasons already defined, namely for reasons of health, work and access to goods and essential services.
