

**SUMMARY OF EVALUATION CRITERIA
INTERNATIONAL CONSULTANT for POWER PLANT PROJECT**

The aim this evaluation is to select the bid that offered the best value for money proposal for this Consultancy Services. This means not simply selecting the lowest-priced bid but also making an assessment of the level of risk associated with selection of a particular Bidder. All of the Bidders cannot be considered equal as they offer different resources, management systems and methodologies that need to be assessed. The lowest priced tender submission may not offer the best value for money solution if the Bidder is offering inadequate resources, poor supervisory staff or management practices or a schedule that is incomplete or sequenced incorrectly.

The evaluation criteria to be considered for this project and the relative importance of each criterion are provided below:

I. EVALUATION TABLE
