a) Apoiu finanseiru ba obra benefisiaun, konsersaun ka reparasaun husi ninia hela-fatin, too valór másimu dolar amerikanu 13000 (dolar amerikanu rihun sanulu-resin-tolu);

b) Apoiu liuhusi materiál sira konstrusaun nian ba substituisaun materiál sira kobertura no revestimentu husi ninia hela-fatin, too valór másimu dolar amerikanu 4000 (dolar amerikanu rihun haat). **REMATA**

# Presidency of the Council of Ministers

VIII Constitutional Government

## Press release

### Extraordinary Meeting of the Council of Ministers of 9 May 2022

The Council of Ministers met at the Government Palace, in Dili, and approved a Draft Law, presented by the Minister of Finance, Rui Augusto Gomes, concerning the **Major Options of the Plan for 2023**. The existence of a Law on Major Plan Options is a requirement of Law no. This Law aims to approve annual and multi-annual options, in terms of planning with an impact on the General State Budget and multi-annual budget programming, which will allow budgeting by programs to be fully implemented.

The Major Plan Options for 2023 present, under the terms of article 47 of Law no. for the following budget year and for the following four years, the multiannual budget programming and the analysis of the projections of the main macroeconomic indicators that influence the General State Budget and its evolution.

This Bill will now be submitted to the National Parliament.

The Council of Ministers also approved the draft Decree-Law, presented by the Minister of State Administration, Miguel Pereira de Carvalho, referring to **the Uma ba Ema Kbiit Laek Plus (UKL+) program**. This draft Decree-Law had already been approved at the meeting of the Council of Ministers on May 6, 2022, however, due to the introduction of some changes in the final drafting phase, it became necessary to submit it for further approval by the Council of ministers. This Decree-Law establishes a special provisioning regime for the implementation of the UKL+ measure. With this new regime, two options are envisaged: one, with the attribution of subsidies through the PNDS suco structures, and another with the possibility of centralized procurement, in order to achieve economies of scale and savings of economic resources.

The program aims to improve the habitability conditions of houses that serve as permanent domiciles for the most vulnerable households, in situations where the house is in a poor state of repair and they do not have another property to take up residence. For the purposes of implementing the UKL+ programme, the most vulnerable households are those whose average daily income does not exceed US\$ 1.25 and whose homes are in a poor state of repair.

Households can benefit from one of the following types of support:

- a) Financial support for works to improve, conserve or repair their housing, up to a maximum of US\$ 13,000;
- b) Support in the form of construction materials for the replacement of covering and cladding materials for your home, up to a maximum of US\$ 4000. **END**
